About The Salty Sea Series

The Salty Sea Series is an environmental book series about conservation and pollution. The series includes different stories on topics between respecting your surroundings and protecting the environment from pollution. These salty sea characters not only inspire kids to explore but also to respect nature.

Kids learn about feelings and emotions in this series. Emotions play a big part in our decision making. When we remember how our choices make us feel we learn from our mistakes. Kids learn from these characters actions when they show their emotions.

The Salty Sea is full of mystery and knowing what we should and shouldn't touch is important. Learning to respect the marine life and the environment may help kids make decisions. When they see something they want to pick up they might think twice about it. Learning about nature is important, especially when you are traveling or exploring. You may find some similarities in plants or animals that your child could be exposed to. These topics are good to have to make sure your child is aware of their surroundings.
